

RECORD BIRD

BACKEND DEVELOPER

(F/M - VIENNA)

We're looking for an ambitious back end developer (f/m), who supports our team at Record Bird in building and maintaining a modern, reliable infrastructure that provides music fans around the world with the latest information. Sounds like just the right challenge for you? Do you share our passion for music and feel a strong drive to create new products? Well, then listen up:

What you'll do at Record Bird

- Build modular back end services that power our client apps and enable new features used by tens of thousands of people
- Drink free drinks from the fridge
- Pick your own design for software architectures
- Enjoy flexible work hours
- Evaluate, integrate and develop existing technologies and frameworks
- Rock out at concerts and B.B.Q.s
- Close interdisciplinary collaboration (web client, iOS, Android, product development)
- Work with a team of cool, motivated people

What you should bring with you

- You share our passion for music (it's why we do what we do)
- You perform independently as well as a team player
- You have a few years of experience with at least one strongly typed, preferably functional programming language, such as Scala, Haskell or OCaml
- You know the ins and outs of JavaScript
- You have a deep knowledge of the fabric of the web (protocols, Linux)
- You have worked with MySQL or similar database technology
- You love the scent of a properly normalized schema
- You have a desire to learn and develop on a personal and technical level
- You're a creative and effective problem solver
- You have experience with agile software development and are willing to develop, test and work with similar processes
- You're experienced with continuous integration, unit- and integration tests
- You're willing to work on and help with various technologies and products beyond the server side applications (chatbots, web app, etc ...)

Sounds like your personal calling?

Then take the opportunity and send us your application today: jobs@recordbird.com
